

Table of contents

Prelude	11
----------------	-----------

Part I - ... Going inside the Black Box

1. ... and Neuroeconomics Appears and Spreads...,	19
by <i>GianMario Raggetti</i>	
References	54
2. Reward-Economic Choices-Decision Making and Dopamine,	65
by <i>Rocco Cerroni, Maria Albanese, Nicola Biagio Mercuri</i>	
2.1 Behavioral economics	66
2.2 Neural correlates in decision making	67
2.3 Dopamine	70
2.4 Pathology	77
2.5 Conclusions	80
Figures	81
References	82
3. Functional Magnetic Resonance Imaging (fMRI) in Neuroeconomics,	87
by <i>Girolamo Crisi</i>	
Figures	91
References	92

4. Neuroimaging: Investigation Tools in Neuroeconomics,	95
by <i>Gabriele Polonara, Mara Fabri</i>	
4.1 Defining cerebral plasticity	96
4.2 Diffusion tensor imaging	96
4.3 What the diffusion tensor imaging can do?	97
4.4 Clinical and research applications of DTI	99
4.5 Human connectome project	102
4.6 Conclusions	102
References	104

Part II - The Brain Functioning

5. Emotion and Decision Making,	107
by <i>Simona Luzzi</i>	
5.1 What is an emotion?	107
5.2 The story of emotions: Moving from philosophy to neurology	108
5.3 Emotions and Decision Making	111
5.4 Emotion and decision making in psychiatric diseases	113
5.5 Emotion and decision making in degenerative brain disorders	114
5.6 Conclusions	115
Figures	116
References	117

6. Decision Making under Risk, Uncertainty and Ambiguity,	121
by <i>Lucrezia Fattobene, Maria Gabriella Ceravolo</i>	
6.1 Traditional models of choice under risk	121
6.2 A neuroeconomics perspective of risk	124
6.3 Anticipatory Affect Model	127
6.4 Risk perception	129
6.5 Framing effect and neural circuits	131
6.6 Ambiguity and Uncertainty	133
6.7 Regret	134
6.8 Conclusions	135
Figures	136
References	138

7. The Neuroscience of Human Intertemporal Choice: State-of-the-Art,

by *Manuela Sellitto, Giuseppe di Pellegrino*

141

7.1 Intertemporal choice and temporal discounting	141
7.2 Lesion studies	143
7.3 Intertemporal choice and other clinical populations	146
7.4 The malleability of intertemporal choice	148
7.5 Conclusions	149
References	151

Part III - The Brain in Economics

8. From Mental Accounting to Neuroaccounting,

by *Frank G.H. Hartmann*

157

8.1 Accounting, accountants and accounting research	158
8.2 Levels of analysis in accounting research	160
8.3 Conclusions	163
References	164

9. Neuromarketing: a Scientific Frontier for Marketing Research,

by *Gianpiero Lugli*

167

9.1 How to improve marketing research	167
9.2 Information and choice	168
9.3 Emotions and choice	169
9.4 How to improve advertising with the help of affective computing technology	170
9.5 How to improve price promotion with the help of affective computing technology	171
9.6 How to improve product innovation with the help of brain imaging technology	172
9.7 How to improve nutrition communication with the help of brain imaging technology	174
Figures and tables	180
References	185

10. Neurofinance: New Frontiers and Further Perspectives,	187
by <i>Lucrezia Fattobene, Maria Gabriella Ceravolo</i>	
10.1 Affective processes and financial decision making	188
10.2 Neuroscience and the possibility to test hypotheses in finance: the realization utility	189
10.3 Traders' behaviour in an ecological setting	192
10.4 The predictive power of neurofinance: theory of mind and financial bubbles	194
10.5 Ocular movements to test hypotheses in finance: the eye tracking methodology	196
Figures	198
References	200
11. <i>Homo Oeconomicus</i>: Personality Neuroscience and Psychopathy,	203
by <i>Luca Passamonti</i>	
11.1 The concept of ' <i>homo oeconomicus</i> ' and its critique	204
11.2 Behavioural economics and neuroeconomics	206
11.3 Decision-making neuroscience and its relationship with neuroeconomics	208
11.4 The need to integrate emotions in decision-making models and the contribution of personality neuroscience	211
11.5 Neuroscience of psychopathy as a modern model of the ' <i>homo</i> <i>oeconomicus</i> '	218
11.6 Conclusions	221
Figures	222
References	226

Part IV - New Curiosities about the Brain

12. A Viable Systems Approach (vSa) to Social Neurosciences,	235
by <i>Sergio Barile, Francesca Iandolo, Stefano Armenia</i>	
12.1 The Viable Systems Approach: the viable system as an information variety	237

12.2 Can System Dynamics constitute a viable quantitative manifestation for a VSA?	239
12.3 Evidencing the Systemic Structure of the Learning Process	243
12.4 Conclusions	246
Figures	247
References	254
13. Eye Movements and Investment Decisions, by <i>Maria Gabriella Ceravolo, Vincenzo Farina, Lucrezia Fattobene, Lucia Leonelli</i>	257
13.1 Eye tracking and economic and financial decision making	258
13.2 Investor behaviour and the Key Investor Information Document (KIID)	260
13.3 Conclusions	262
Figures	263
References	265
14. Neuroeconomics and Insurance: a Look Forward, by <i>Riccardo Guerrini</i>	267
Some Reflections and Perspectives	271
List of Contributors	273
