Introduction: What kind of visual merchandising?	3
<b>1. Store atmosphere as a preferential dimension of the store experience</b>	11
1. The store as an emblematic experience	11
2. Store atmosphere	13
3. Thematic universes	14
4. Interaction between the atmosphere and the customer	22
4.1 Spheres of action	26
5. A unique experience	28
6. Cost-benefit analysis in an experiential approach	30
7. The expert in quality relationships	31
8. New trends in store design	32
<b>2. Interactive environments: new dimensions in communication</b>	35
1. Hypermedia stores	35
2. Moving toward digital communication	39
2.1 Digital screens: a battle to the last centimeter	40
3. Augmented reality	42
4. Augmented retailing	44
5. Anteprema emotions by Senso	47
6. Interactive store windows	49
<b>3. From identity systems to visual merchandising</b>	53
1. The visible domain	53
2. From store identity to store concept	54

3. Centrality of a coordinated image, substantiating the brand, or communicating by subtraction?	56
4. Integration between the company and the store designers	58
5. Developing the store design	59
5.1 The preliminary stage	60
5.2 The project development stage	61
5.3 Awarding contracts and executing work	61
5.4 The post-opening stage	62
6. Implementing identity systems in a retail chain: from replicability to difference	62
7. From merchandising to visual merchandising: definitions and scope	65
7.1 Visual merchandising and assisted selling	66
8. Visual merchandising, purchase intentions and impulse purchases	68
9. Balancing conflicting needs	73
10. The profile of a visual merchandiser	74
11. Virtual visual merchandising	75
12. Innovative retail design as a strategic asset in luxury companies: the Vivienne Westwood case	76
12.1 The Vivienne Westwood story: the transformation from punk to couturier to international designer	77
12.2 The evolution of the retail concept at 430 King's Road	79
12.3 Mapping the store: Corso Venezia 25	80
12.4 Analyzing the new retail concept: Via Vincenzo Capelli 4	85
<b>4. Visual merchandising and communication outside of the store</b>	<b>89</b>
1. Interface design	89
2. The store sign	95
3. The façade and the entrance	98
4. The window	103
4.1 Functions of the window	106
4.2 The open window	109
4.3 The closed window	111
4.4 The semi-closed window	113
4.5 Managing the space	114
4.6 Lighting	124
4.7 Planning	128
4.8 Check list for an effective window	129

<b>5. The layout: physical mobility to informational mobility</b>	133
1. A theatrical production	133
2. The customer's perceptive pathway through the store	134
3. Functions of the layout	137
3.1 Crowding	139
4. Planning the layout of display fixtures	141
4.1 Balancing the dynamics of supply and demand	142
4.2 A good start: the decompression zone	144
5. Display fixtures	147
6. Types of layouts for in-store displays	151
6.1 The grid layout	152
6.2 The herringbone layout	155
6.3 The circular layout	156
6.4 The island layout	158
6.5 The boutique layout	161
7. Organizing the store by specializations and trades	165
8. Organizing the product layout	169
8.1 Criteria for grouping products	170
8.2 Zoning and allocating display space: some empirical rules	178
8.3 Sizing the areas of the store	182
9. The focal point	183
10. The display point	186
11. Physical mobility and communicative mobility: graphics and signage	188
<b>6. The display and space allocation</b>	195
1. Visual attention	195
2. The display	198
2.1 Methods for displaying products	199
2.2 Display techniques	201
2.3 Display dimensions	212
3. Space allocation	215
4. Quality of space	217
4.1 Vertical product presentation	218
4.2 Horizontal product presentation	221
4.3 Shoulder out, face forward and stacked product presentation	223
5. Quantifying space and saturating the linear display	225

6. Shelf management for maximum performance: linears, ends and end caps	228
7. Cross-mix displays	230
8. Double displays	231
9. Massified displays	232
10. Empirical criteria for space allocation	234
10.1 Breaking down the linear by sales	235
10.2 Breaking down the linear based on gross profit margin	237
11. The planogram	239
12. Correctives for the linear display	241
13. The shift toward micro visual merchandising	243
14. What factors impact the choices that shoppers make in the “moment of truth”? <i>by Matteo Testori</i>	244
15. A sense of space: the Lush case	249
15.1 The new Lush format in Milan, Via Torino	251
15.2 Exterior design	252
15.3 Interior design	253
15.4 The display arrangement	255
15.5 The product layout	255
15.6 The display	257
15.7 Design and visual merchandising, together in eternal evolution	258
<b>7. Point of purchase communication</b>	<b>261</b>
1. Moving toward integrated communication	261
2. Tools and objectives	263
3. Focus	264
4. Design	265
4.1 Physical-technical characteristics	265
4.2 Duration	265
4.3 Functional features	269
5. Assembly, installation and maintenance	271
5.1 POP on the product	273
5.2 POP on the shelf	274
5.3 POP off the shelf (stand-alone displays)	274
6. International POP communication	281
7. Channel relationships	282
8. Digital POP: the Canon case	286
8.1 Technical specifications	287

8.2 The project designer	291
8.3 Installing the interactive kiosks	292
<b>8. Visual merchandising in channel relationships</b>	<b>295</b>
1. Visual merchandising by industry in multibrand distribution	295
1.1 The technical-formal core of visual merchandising	297
1.2 The value-based core of visual merchandising	299
2. The organization of visual merchandising by industry	301
2.1 Visual merchandising by the sales force	303
2.2 Visual merchandising by a network of specialized professionals	304
2.3 Visual merchandising by a negotiating group with the support of an external agency	307
3. The organization of visual merchandising by distribution	309
3.1 Visual merchandising as a decentralized function	310
3.2 Visual merchandising both centralized and decentralized	310
3.3 Visual merchandising as a centralized function	311
4. Integration: a complicated task	311
<b>9. Evaluating the effectiveness of store design activity from an experiential perspective</b>	<b>313</b>
1. The customer-product-space relationship	313
1.1 Experienced space and the gestures customers use when interacting with the product	314
1.2 Perceived space and perceptive stimuli	315
1.3 Imagined space	316
2. Observational analysis: the Aspesi case, <i>by Giusi Scandroglio</i>	316
2.1 The Aspesi flagship store in Via Montenapoleone	318
2.2 Analysis of the flagship store	319
2.3 Entrance and windows	319
2.4 The structure of the store	321
2.5 The decompression zone	321
2.6 How customers use the flagship store	323
2.7 Interaction and purchase	324
2.8 Conclusions	325
3. Conducting in-store qualitative research using mobile technology: the Kikke by Kasanova case, <i>by Giusi Scandroglio</i>	326

3.1	Capture: Kikke, a Kasanova store in an innovative designer context	327
3.2	Experience: a small space full of surprises	328
3.3	Shopability: the product is always in charge	332
3.4	Conversion: little impulse purchases	334
